Product Description

Reciprocating and Sternum Saws are battery powered heavy duty tools with a trigger and a function switch (for operations in fast, standard, or safe mode) individually. They are equipped with a mechanism to allow blade changes during surgery. A reciprocating saw is a general-purpose bone cutting tool that can be used on various bones in a surgical procedure, while a sternum saw is specifically designed to cut through the sternum.

Product Issue

There is a potential for the Compression Spring (0038-419-000) inside the saw's drivetrain assembly to disengage during blade loading and unloading. A disengaged spring disables the blade collar from springing back to its original home position, potentially leading to blade retention failure when loading a blade.

Potential Risks

There is a potential risk for blade retention failure, with a possibility of injury to tissue or critical structures which may require medical or surgical intervention.

Actions Needed

1. Review your inventory to locate and quarantine any affected products at your facility. Reach out to your Sales Representative for assistance in locating your serial number(s).
2. Return the enclosed Business Reply Form (BRF), even if the affected product is no longer in inventory, to the email xxx@stryker.com.
3. Upon receipt of your BRF, Stryker In-house Service will contact you with the shipping information to return your device for repair.
4. Your device will be returned to you once repairs have been completed.
5. Maintain awareness of this communication internally until all required actions have been completed.

Your designated contact person for this action is given below. Should you have any queries concerning the matter please do not hesitate to contact them directly.
